EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin Stinger on September 16, 2005.

The application has been amended as follows:

- Replace claim 12 with the following version:

12. A collimating device as defined in claim 11, wherein the core portion second end is slidably engaged with the adapter portion first end to enable the linear axial movement in the longitudinal direction with respect to the collimating portion before the core portion is bonded to the adapter portion.

- Replace claim 13 with the following version:

13. A collimating device as defined in claim 12, wherein the collimating portion is bonded to the adapter portion between the first and second engagement surfaces after relative movement is performed, and wherein the core portion second end is bonded to the adapter portion first end after relative movement is performed.

Art Unit: 2874

- Replace claim 15 with the following version:

15. A collimating device as defined in claim 14, wherein a gap existing between the first and second engagement surfaces is minimized, and wherein a gap existing between the core portion second end and the adapter portion first end is minimized.

The above amendment effectively deletes “has a reduced diameter and” from claim 12 and deletes “reduced diameter” from claims 13 and 15.
